Pemrograman PHP

Andriyanto NA

AI Engineer | Machine Learning & MLOps | LLM Engineering |
Python | Precision Agriculture & AgriTech
Jakarta Timur, Jakarta Raya, Indonesia

Ringkasan

AI Engineer focused on building and deploying production-ready AI systems that turn real-world problems into practical products. My work sits at the intersection of Machine Learning, MLOps, LLM Engineering, Computer Vision, and Precision Agriculture. I enjoy taking an AI idea from data and experimentation through system design, integration, deployment, and continuous improvement.

FLAGSHIP PROJECT — AgriSensa AI built AgriSensa, an AI-powered agriculture intelligence platform designed around real-world challenges faced by farmers and agricultural stakeholders in Indonesia. The platform combines:

- LLM-powered AI assistance using Google Gemini
- Computer Vision for plant disease detection with Roboflow
- Machine Learning for price forecasting and yield prediction
- Real-time weather and agricultural data integration
- GIS and data visualization for agricultural intelligence

Modular architecture designed for extensibility and deployment. The system currently includes 25+ production-oriented modules and has been deployed through cloud platforms, demonstrating my focus on building usable AI products—not just experimental notebooks.

ENGINEERING APPROACH I focus on the complete AI product lifecycle:

- Data → preprocessing, feature engineering, and analysis
- Modeling → Machine Learning, Deep Learning, and Computer Vision
- AI Systems → LLM integration, multimodal AI, and orchestration
- MLOps → testing, containerization, CI/CD, deployment, and monitoring
- Product Engineering → modular architecture, APIs, user experience, and iteration

I have hands-on experience with Python, PyTorch, TensorFlow, scikit-learn, FastAPI, Flask, Streamlit, Docker, GitHub Actions, SHAP, Google Gemini, and Roboflow.

WHAT I BRING I don't see AI as just a model-building exercise. My goal is to bridge the gap between AI research, software engineering, and real-world users—turning models and APIs into reliable products that people can actually use. My agriculture background also gives me a domain perspective that helps me approach AI problems from both the technology and real-world

operational sides. CURRENTLY OPEN TO AI Engineer Machine Learning Engineer MLOps Engineer LLM / Generative AI Engineer AI Software Engineer I'm particularly interested in AI products, AgriTech, ClimateTech, and other domains where applied AI can create measurable real-world impact. Based in Japan | Open to Japan, APAC, and global opportunities.

Pengalaman

Utel Universidad

Student

Mei 2023 - Present (3 tahun 5 bulan)

Prefektur Aichi, Jepang

Kodim Pesisir Selatan

11 tahun

Agriculture Teacher

2015 - Present (11 tahun)

Delivered organic farming training for military personnel and local farmers.

Promoted sustainable cultivation techniques and organic fertilizer production.

Supervisor Pertanian Organik

Januari 2015 - Mei 2015 (5 bulan)

Pesisir Selatan, Sumatera Barat, Indonesia

Yamasa japan

Staff

September 2022 - Mei 2023 (9 bulan)

Prefektur Shizuoka, Jepang

Yamasa no Niwa

Operational Specialist

2022 - 2023 (1 tahun)

Applied data-driven approaches and Japanese 5S methodology to optimize landscape operations and improve crop quality consistency.

PT. IMPACT POWER MANDIRI

Supervisor

April 2021 - Agustus 2022 (1 tahun 5 bulan)

Tokopedia Mitra — PT Impact Power Mandiri
Customer Specialist
2021 - 2022 (1 tahun)

Supervised merchant onboarding and activation across assigned territories. Monitored activation rate, retention, funnel progression, and transaction metrics. Identified onboarding bottlenecks and escalated issues with structured evidence. Ensured SOP compliance and data accuracy in merchant registration. Conducted weekly performance reviews using dashboards and reports.

Tapp Group
Field Supervisor
November 2020 - April 2021 (6 bulan)

Toko Pintar
Staff
Juni 2020 - November 2020 (6 bulan)

Kudo - PT Kudo Teknologi Indonesia
Staff
November 2018 - Mei 2020 (1 tahun 7 bulan)

GrabKios Indonesia
Digital Specialist
2018 - 2020 (2 tahun)

Collected behavioral data on agent onboarding, transactions, and product adoption. Identified friction points and created evidence-based hypotheses for root causes. Monitored campaign performance and adoption metrics at field level. Conducted structured interviews and user behavior observations. Logged operational issues with categorization and frequency tracking.

PT 8villages Indonesia
Office Staff
Juli 2017 - Januari 2018 (7 bulan)

PT 8Villages
Program Coordinator
2017 - 2018 (1 tahun)

Led digital agriculture initiatives and trained farmers on technology adoption. Managed agronomic data collection and field operations for a 2-hectare chili project. Acted as liaison between investors and farmer groups.

Fujikikou

Staff

November 2009 - November 2012 (3 tahun 1 bulan)

Prefektur Shizuoka, Jepang

PT Fujikikou

Technical Intern

2009 - 2012 (3 tahun)

Completed intensive technical training in industrial manufacturing and machine maintenance. Applied 5S principles and Japanese work discipline in production environments.
